Polish - B1

EDUCATION

Kyryvi Rih National University

Faculty of Electrical Engineering

2012-2017

Educational platform SkillBox

Frontend Developer

April 2021 - July 2022

EXPERIENCE

Real Estate App

The app was created with NextJS. The application uses real data from RapidAPI. The pages were designed with [Chakra-UI](#) and are responsive for mobile devices. The app allows to perform filtered search for properties and works with query params. The app is deployed on Vercel.

Cryptocurrency App

The app was created with React and its design was made with [Ant.design](#). The app fetches real data from [Cryptocurrencies](#) and [News](#) on RapidAPI. The app has a detailed page dedicated to each cryptocurrency. The cryptocurrency charts were created with chart.js. The news page allows to search by currency. I use state management with redux-toolkit for the search of the news page. The app is deployed on [GitHub Pages](#).

CryptoCap

Fully responsive layout with HTML, SCSS, JavaScript

Clients

This page is for saving, sorting and searching for clients and their contacts. I used a Heroku database to record clients. The page was created with JavaScript and CSS.

Blanchard

Fully responsive layout with HTML, CSS, JavaScript
